Daily Project Progress Report

Project Title: Student Study Planner

Course: BCA

Team Members: Malvika, Kavi Varshini

Date: 17-12-2025

Work Done

Yesterday, work was carried out on creating the basic structure of the Student Study Planner project. The dashboard page was designed and developed with a simple and user-friendly layout. Features such as daily study goal input, study timer with start, stop, and reset options were implemented. The system calculates completed study time and remaining time accurately. A progress pie chart was added to visually show study progress. Navigation between different sections was tested to ensure smooth functionality.

Outcome

The dashboard module was completed successfully and all features are functioning properly.

Next Plan

To work on the study planner and test modules.
