Daily Project Progress Report – Today

Project Title: Student Study Planner

Course: BCA

Team Members: Malvika, Kavi Varshini

Date: 18-12-2025

Work Done

Today, work was done on developing the Study Planner and Test sections of the project. The study planner module was implemented to generate subject-based content for SQL, Operating System, and Network Security with definitions and key points. The test module was created with multiple-choice questions based on the selected subject. Automatic score calculation was implemented after test submission.

Outcome

The study planner and test modules were implemented successfully and are working correctly.

Next Plan

To add a calendar feature for scheduling study tasks and improve overall testing.
